

PERSONAL EXAM MARKS TRACKER

OUR TEAM

- **HAKESH**
- **SIDHARTH**
- **SARAVANAN**
- **JIYAADH**
- **AARATHANA [TEAM LEADER]**

PROJECT OVERVIEW

- The Personal Exam Performance Analyzer is a Java-based application designed for individual school students to monitor and analyze their academic performance across multiple exams. Unlike a basic marks calculator, this application not only calculates marks and grades but also provides meaningful insights by comparing the student's current exam with previous exams.
- The main objective of the project is to help students understand how their performance changes over time, identify their strengths and weaknesses, and receive personalized recommendations for improvement.
- The application acts as a personal academic companion, allowing students to make better study decisions based on their own performance data.

PROBLEM STATEMENT

Many students only look at their total marks after each exam and do not analyze how their performance has changed compared to previous exams.

Because of this, they may not realize:

- Which subjects are improving
- Which subjects are declining
- Whether their overall performance is getting better
- Which subjects require more attention
- How close they are to achieving their academic goals

This project solves this problem by automatically analyzing the student's exam results and providing detailed feedback and recommendations.

SYSTEM FLOW / ARCHITECTURE

PROJECT OBJECTIVE

THE PROJECT AIM IS TO:

- Store a student's exam marks.
- Calculate basic statistics such as total, average, percentage, and grade.
- Compare the current exam with the previous exam.
- Analyze subject-wise improvements and declines.
- Identify strengths and weak areas.
- Recommend subjects that require more focus.
- Predict future performance based on current progress.
- Motivate students through achievements and performance reports.

MAIN FEATURES

Basic Features

- **Student Details**
- **Marks Entry**
- **Total Marks**
- **Average**
- **Grade Calculation**
- **Highest Subject**
- **Lowest Subject**

Advanced Features

- **Overall Performance Comparison**
- **Subject-wise Improvement Analysis**
- **Biggest Change Detector**
- **Improvement Score**
- **Subject Performance Meter**
- **Consistency Checker**
- **Exam Health Report**
- **Smart Study Recommendation**
- **Study Priority Generator**
- **Marks Gap Analysis**
- **Target Prediction**
- **Achievement System**

PROJECT WORKFLOW

STEP-1 USER REGISTRATION

The student creates an account by entering :

- Username
- Password
- Confirm Password

The credentials are saved for future login.

STEP-2 LOGIN

The student enters:

- Username
- Password

The system verifies the credentials.

- ✓ Valid → Opens Dashboard
- ✗ Invalid → Displays an error message and asks the user to try again.

STEP-3 STUDENT PROFILE

The student enters:

After successful login, the student enters (only once):

- Name
- Roll Number (optional)
- Class/Grade (optional)
- School Name (optional)

The profile is saved.

STEP-4

ENTER CURRENT EXAM DETAILS

The student enters :

- Exam Name (Unit Test 1, Quarterly, Half-Yearly, etc.)
- Subject-1 Marks
- Subject-2 Marks
- Subject-3 Marks
- Subject-4 Marks
- Subject-n Marks

STEP-5

BASIC PERFORMANCE ANALYSIS

The application calculates :

- **Total Marks**
- **Average**
- **Grade**
- **Highest Subject**
- **Lowest Subject**

OVERALL PROGRESS REPORT

RESULTS

✦ The project will provide students with more than just their marks. It transforms raw scores into meaningful insights, helping them understand their academic progress, recognize strengths and weaknesses, and make informed decisions about what to improve before the next exam. ✦

Rather than functioning as a simple marks calculator, the Personal Exam Performance Analyzer serves as a student-centric academic performance tracking and decision-support tool that encourages continuous improvement and smarter study planning. ✦

THANK YOU
